# ClearToken

1. **The Clear Token app on your smart phone establishes a Bluetooth connection with our devices.**

2. **The Clear Token app acquires device information from our cloud server.**

3. **User specifies the device and the amount of time.   The app then requests authorization from  payment processor.**

4. **If transaction is approved, the payment processor authorizes a token and it is forwarded to smart phone.**

5. **The app uses Bluetooth to deliver the token to the device which then flashes "PAID" for the specified time.**

## The only connection to the Internet is the user's smartphone
