

Technology

All Clear Token products are manufactured using cutting edge Technology. We are the first solution offering a fully integrated Bluetooth LTE solution for parking payments with a parking device.

Enforcement

When completing a parking transaction via a cell phone, our devices will flash a visible display for viewing by both enforcement and the parker, that the parker has paid to park.

Reliable

Our products are tough, reliable, accurate and weather tested. They are designed for flexible enforcement, programming, long battery life and ease of use.

Finance

The increased revenue will more than pay for the products in a very short period. For as little as \$1.00 per month per device Clear Token provides all equipment, services and support.

Warranty

Our product line comes with a solid warranty based on the confidence, quality and simplicity of our solutions.
